LAST AMENDED

M1 M2 M3

(a) Minimum maneuvering space

In all districts, as indicated, for all #accessory# off-street parking spaces, open or enclosed, each 300 square feet of unobstructed standing or maneuvering area shall be considered one parking space, except as follows:

(1) Standard attended facilities

An area of less than 300 square feet, but in no event less than 200 square feet, may be considered as one space, where the layout and design of the parking area are adequate to permit convenient access and maneuvering in accordance with regulations promulgated by the Commissioner of the Department of Buildings, or where the applicant for a building permit or certificate of occupancy certifies that such spaces will be fully attended.

In any case where a reduction of the required area per parking space is permitted on the basis of the applicant's certification that such spaces will be fully attended, it shall be set forth in the certificate of occupancy that paid attendants employed by the owners or operators of such spaces shall be available to handle the parking and moving of automobiles at all times when such spaces are in use.

(2) Attended facilities with parking lift systems

For portions of an attended parking facility with parking lift systems, each individually lifted tray upon which a

vehicle is stored shall be considered one parking space. Any other attended space not on a lifted tray shall be subject to the provisions of paragraph (a)(1) of this Section.

(3) #Automated parking facilities#

For #automated parking facilities#, each tray upon which a vehicle is stored shall constitute one parking space. The term “tray” shall refer to the structural support for vehicle storage in both pallet and non-pallet vehicle storage systems.

However, auxiliary parking trays in an #automated parking facility# may be exempted from constituting a parking space where the Commissioner of Buildings determines that such auxiliary parking trays are necessary to store and retrieve vehicles for the efficient operation of such #automated parking facility#.

(b) Driveway access

Driveways used to access required parking spaces must be unobstructed for a width of at least eight feet and a height of eight feet above grade and if connecting to a #street#, such driveway may only be accessed by a curb cut.

(c) Minimum size for each parking space

In no event shall the dimensions of any parking stall be less than 18 feet long and 8 feet, 6 inches wide.

44-422 - Identification of car sharing vehicles

LAST AMENDED

12/6/2023

Within an off-street parking facility that contains #car sharing vehicles#, an information plaque shall be placed at a location accessible to and visible to users of such facility. The plaque shall be fully opaque, non-reflective and constructed of permanent, highly durable materials and shall contain the following statements in lettering no less than one inch high:

- (a) “Total parking spaces in facility:” which shall specify the total number of parking spaces permitted within such parking facility; and
- (b) “Maximum number of car sharing vehicles:” which shall specify the total number of #car sharing vehicles# permitted within such parking facility.

However, access located within 50 feet of such intersection may be permitted if the Commissioner of Buildings or, in the case of #public parking lots# or #public parking garages# permitted in accordance with the provisions of Article VII, Chapter 4, the City Planning Commission certifies that such a location is not hazardous to traffic safety and not likely to create traffic congestion. The Commissioner of Buildings or the City Planning Commission may refer such matter to the Department of Transportation for a report and may base its determination on such report.

The waiver provisions of Section [44-24](#) (Waiver of Requirements for All Zoning Lots Where Access Would Be Forbidden) shall apply when the Commissioner of Buildings has certified that there is no way to arrange the spaces with access to the #street# to conform to the provisions of this Section.

LAST AMENDED

12/6/2023

M1 M2 M3

In all districts, as indicated, all open #accessory# off-street parking spaces or permitted #public parking lots# shall be graded, constructed, surfaced, and maintained so as to provide adequate drainage and to prevent the release of dust, in accordance with rules and regulations promulgated by the Commissioner of Buildings.

Any area intended to be used permanently for an open #accessory# #group parking facility# shall be surfaced with permeable paving materials, asphaltic or Portland cement concrete, or other hard-surfaced dustless material.
