66-42 - Termination of a Transit Volume

LAST AMENDED
10/7/2021

In the event that the #transit agency# and the Chairperson of the City Planning Commission jointly notify, in writing, the owner of the #zoning lot# and the Department of Buildings that a #transit volume# is not needed on such #zoning lot# in its final construction plans, the restrictions imposed on such #zoning lot# by the provisions of this Section shall lapse, following receipt of notification thereof by the owner, and the owner shall have the right to record an instrument reciting the consent of the #transit agency# to the extinguishment of the #transit volume#.

Where initially determined that an #easement volume# is needed on any #zoning lot# which has been #developed#, #enlarged# or #converted# in accordance with the provisions of this Chapter, where termination of such #easement volume# has been certified pursuant to this paragraph, the #use# provisions of Section 66-221 (Temporary uses) and Section 66-222 (Special use allowances around easement volumes) shall continue to apply to any floor space in a previously needed #easement volume# and around such #easement volume# where special #uses# allowances are permitted in #Residence Districts# pursuant to this Chapter. Additionally, any floor space in a previously needed #easement volume# shall continue to be exempt from the definition of #floor area# and shall not be included for the purpose of calculating requirements for #accessory# off-street parking, bicycle parking or loading berths. However, where such previously needed volume is located within a #building#, the ground floor space shall be subject to all applicable ground floor level requirements of this Resolution.
