---

## 74-14 - Public Service Facilities and Infrastructure

---

LAST AMENDED

6/6/2024

---

### 74-141 - Fire or police stations

---

LAST AMENDED

6/6/2024

In all #Residence Districts#, the City Planning Commission may permit fire or police stations listed under Use Group IV(A), provided that the following findings are made:

- (a) that such #use# will serve the residential area within which it is provided to be located; that there are serious difficulties in locating it in a district wherein it is permitted as-of-right and from which it could serve the residential area, which make it necessary to locate such #use# within a #Residence District#; and
- (b) in the case of fire stations, that such #use# is so located as to minimize the movement of fire apparatus through local #streets# in residential areas.

For any such #use#, the Commission may permit appropriate modifications of the applicable regulations of Article II, Chapter 3, provided that such #use# complies with all the applicable district #bulk# regulations for #community facility buildings# as set forth in Article II, Chapter 4.

The Commission may prescribe appropriate conditions or safeguards to minimize adverse effects on the character of the surrounding area, including requirements for landscaping.

---

## 74-142 - Electric utility substations

---

LAST AMENDED

6/6/2024

In all #Residence# and #Commercial Districts#, and in M1 Districts in the #Special Downtown Jamaica District#, the City Planning Commission may permit electric utility substations (including transformers, switches, or auxiliary apparatus) listed under Use Group IV(B), limited in each case to a site of not less than 40,000 square feet nor more than 10 acres, provided that the following findings are made:

- (a) that there are serious difficulties in locating such #use# in a nearby district where it is permitted as-of-right;
- (b) that the site for such #use# is so located as to minimize the adverse effects on the integrity of existing and future development;
- (c) that the architectural and landscaping treatment of such #use# will blend harmoniously with the rest of the area; and
- (d) that such #use# will conform to the performance standards applicable to M1 Districts.

The City Planning Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area, including requirements for soundproofing of electric substations, for the construction of fences, barriers, or other safety devices, for surfacing of all access roads and driveways, for shielding of floodlights or other artificial illumination, or for landscaping or screening.

---

## 74-143 - Sewage pumping stations and sewage disposal plants

---

The City Planning Commission may permit sewage pumping stations and sewage disposal plants listed under Use Group IV(B) pursuant to paragraphs (a), (b) or (c) of this Section, as applicable.

(a) Private sewage pumping stations and sewage disposal plants

In all #Residence Districts#, the Commission may permit private sanitary or storm water sewage pumping stations and sewage disposal plants, provided that:

- (1) such use will serve a #development# which contains more than 15 #dwelling units#;
- (2) there are serious difficulties in locating it in a district where it is permitted as-of-right from which it could serve the residential area;
- (3) in the case of sewage pumping stations, the sewers and treatment plants to which the flow is to be pumped will be adequate to accommodate anticipated future development in the area to be served by these facilities;
- (4) for sewage disposal plants:
  - (i) the related #development# is arranged in such a way as best to serve active and passive recreation needs; protect and preserve scenic assets and natural features such as trees, streams and topographic features; and provide suitable variations in the siting of #buildings# to achieve these objectives; and
  - (ii) the proposed plant will be adequate for anticipated development in the area to be served; or

- (5) in all cases, the proposal promotes and protects the public health, safety and general welfare.

In addition, the Commission shall refer such application to the Department of Health and the Department of Environmental Resources for a report.

The Commission may review the scope and impact of the proposal on public facilities and may, in addition, prescribe appropriate conditions or safeguards without dictating the architectural design of individual #buildings# in order to minimize adverse effects on the surrounding area.

(b) Private sewage disposal plants

In all #Residence Districts#, #Commercial Districts# and M1 and M2 Districts, the City Planning Commission may permit private sewage disposal plants provided that:

- (1) such #use# will serve the commercial or residential area within which, or adjacent to which, it is to be located;
- (2) that in the case of a residential area, such area contains more than 50 #dwelling units#; and
- (3) that there are serious difficulties in locating it in a district where it is permitted as-of-right from which it could serve the residential area or commercial area.

In addition, the Commission shall refer such application to the Department of Health and the Department of Environmental Protection for a report.

The Commission may prescribe appropriate conditions or safeguards to minimize adverse effects on the character of the surrounding area including safety devices and the concealment of such #use# with fences, buffer zones, barriers or other screening devices, and landscaping.

(c) Municipal sewage pumping stations and sewage disposal plants

In all #Residence Districts#, the Commission may permit municipal sewage pumping stations, and in all #Residence Districts#, #Commercial Districts# and M1 and M2 Districts, the Commission may permit municipal sewage disposal plants, provided that:

- (1) there are serious difficulties in locating it in a district where it is permitted as-of-right;
- (2) in the case of sewage disposal plants, the proposed plant will be adequate for anticipated development in the area to be served;
- (3) in the case of sewage pumping stations, the sewers and treatment plants to which the flow is to be pumped will be adequate to accommodate anticipated future development in the area to be served by these facilities; and
- (4) in all cases, the proposal promotes and protects the public health, safety and general welfare.

The Commission may prescribe appropriate conditions or safeguards to minimize adverse effects on the character of the surrounding area including safety devices and the concealment of such #use# with fences, buffer zones, barriers or other screening devices and landscaping.

---

## 74-144 - Airports

---

LAST AMENDED

6/6/2024

In all #Manufacturing Districts#, the City Planning Commission may permit the construction, reconstruction, or #enlargement# of airports and their facilities listed under Use Group IV(B), in any

case where the applicant has submitted a site plan showing the location and dimensions of all runways, provided that the following findings are made:

- (a) that the airport is an appropriate #use# of the land and will not unduly interfere with surrounding land #uses#; and
- (b) that due consideration has been given to the selection of a site situated near or adjacent to large parks or other open areas, or bodies of water.

The Commission shall refer the application to the Federal Aviation Administration, for the report of such agency as to whether such airport is either an integral part of, or will not interfere with, the general plan of airports for New York City and the surrounding metropolitan region; and whether a new, reoriented, or lengthened runway will interfere with the flight pattern of any nearby airport.

The Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area, and in the event that the application is granted, the Commission may adopt a resolution to amend the #zoning maps# so that for a depth of at least one-quarter mile around the entire perimeter of the airport, any adjacent #Residence District# shall be mapped as an R1, R2, or R3 District, and any adjacent #Commercial# or #Manufacturing District# shall be mapped as a C1, C2, C3, C4-1, C7, C8-1, C8-2, M1-1, M1-2, M1-4, M2-1, M2-3 or M3 District.

The Commission shall require the provision of adequate #accessory# off-street parking spaces necessary to prevent the creation of traffic congestion caused by the curb parking of vehicles generated by such #use# and shall determine the required spaces in accordance with the purposes established in this Resolution with respect to other major traffic-generating facilities.

---

## 74-145 - Bus stations

---

The City Planning Commission may permit bus stations listed under Use Group IV(B) with fewer than 10 berths pursuant to paragraph (a) of this Section, and with 10 or more berths pursuant to paragraph (b) or paragraph (c), as applicable.

All bus stations lawfully existing on December 15, 1961 are permitted to continue for the duration of the term for which such #use# has been authorized but the #enlargement#, #extension#, reconstruction or relocation of any bus station heretofore or hereafter constructed shall not be permitted except in accordance with the provisions set forth in this Section.

- (a) In C1, C2, C4, C6, C7 or C8 Districts, or in any #Manufacturing District#, the Commission may permit bus stations with fewer than 10 berths for buses on a site of not less than 20,000 square feet, provided that the following findings are made:
- (1) that the use of the premises as a bus station will not create serious traffic congestion, will not be detrimental to public health or general welfare and is consistent with the master plan of the city;
  - (2) that the principal access of such #use# is not located on a local #street#;
  - (3) that vehicular entrances and exits for such facility are provided separately and are located not less than 50 feet apart; and
  - (4) that access to such #use# is located on a #street# not less than 60 feet in width.

The Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area.

In addition, the Commission shall require the provision of adequate #accessory# off-street parking spaces necessary to prevent the creation of traffic congestion caused by the curb parking of vehicles generated by such #use#, and shall determine the required spaces in accordance with the purposes established in this Resolution with respect to other major traffic-generating facilities. The Commission shall require, in any event, not less than 10 spaces for the temporary parking of automobiles.

- (b) In C4, C6 or #Manufacturing Districts#, the Commission may permit the construction of a bus station with 10 or more berths for buses on a site of not less than 20,000 square feet, provided that the following findings are made:
- (1) that the use of the premises as a bus station will not create serious traffic congestion, will not be detrimental to public health or general welfare and is consistent with the master plan of the city;
  - (2) that the principal access for such #use# is not located on a local #street# but is located either on an arterial highway, a major #street# or a secondary #street# within one-quarter mile of an arterial highway or major #street#;
  - (3) that such #use# is not located within 200 feet of a #Residence District#, or is otherwise separated from nearby #residential# areas by topographical or physical conditions of the land;
  - (4) that vehicular entrances and exits for such facility are provided separately and are located not less than 100 feet apart; and
  - (5) that access to such #use# is located on a #street# not less than 60 feet in width.

The Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area.

In addition, the Commission shall require the provision of adequate #accessory# off-street parking spaces necessary to prevent the creation of traffic congestion caused by the curb parking of vehicles generated by such #use# and shall determine the required spaces in accordance with the purposes established in this Resolution with respect to other major traffic-generating facilities. The Commission shall require, in any event, no less than 20 spaces for the temporary parking of automobiles.

- (c) In any #Commercial District# or #Manufacturing District#, the Commission may permit the construction of a bus station with 10 or more berths for buses on a site of any size, where the #bus station and related facilities# are located wholly or partially in the #Special Midtown District# within Community District 4 in the Borough of Manhattan.

For purposes of this paragraph (c), a “bus station and related facilities” shall refer to: any bus station and #uses# #accessory# thereto that are #developed# in accordance with a special permit granted under this paragraph (c); and any #uses# that are constructed and maintained pursuant to Chapter 8 of Title 17 of the Unconsolidated Laws of New York.

In conjunction with a permit for a bus station, when the air space above a #street# or portion thereof is closed, demapped and conveyed by the City to the owner of an adjoining #zoning lot# that will contain such bus station, the Commission may permit, in such demapped air space, the #development# or #enlargement# of a #building# or portion thereof which is part of such bus station. The Commission may also permit, in connection with such bus station or any other #use# #developed# on the same #zoning lot# as such bus station, the modification of any applicable mandatory district plan elements, #bulk# regulations of this Resolution other than #floor area ratio# provisions, or the distribution of total allowable #floor area# without regard

for #zoning lot# lines or district boundaries.

In order to grant such a permit, the Commission shall determine that the conditions set forth in paragraph (c)(1) and the findings set forth in paragraphs (c)(2) and (c)(3) of this Section, as applicable, are met.

Where the #bus station and related facilities# allowed under this Section will be #developed# pursuant to Chapter 8 of Title 17 of the Unconsolidated Laws of New York, any #buildings or other structures# comprising such #bus station and related facilities# shall not be subject to the #bulk# regulations or other applicable regulations of this Resolution, and the floor space within such #buildings or other structures# shall be excluded from the calculation of #floor area#.

The curb level of a zoning lot of which the demapped air space is a part shall not be affected by the closing and demapping of air space above such #street#. However, the Commission may establish an appropriate level or levels instead of curb level as the reference plane for the applicable regulations relating to open space, yards, level of yards, equivalent rear yards, rear yard setback, minimum distance between buildings, and height and setback.

(1) Conditions

Where the #development# or #enlargement# of a #building# is allowed within one or more demapped air spaces pursuant to this Section, such demapped air spaces and any adjoining tracts of land containing such #building# may be considered as part of a single #zoning lot#, but such demapped air spaces shall not generate #floor area# to be utilized on such #zoning lot#.

(2) Findings applicable to bus station #use#

In order to allow such bus station #use#, the Commission shall find that:

- (i) the operation of such bus station does not create serious traffic congestion, and is not detrimental to public health or general welfare of the city;
- (ii) the principal access for such #use# is not located on a local #street# but is located either on an arterial highway, a major #street# or a secondary #street# within one-quarter mile of an arterial highway or major #street#;
- (iii) the site plan for the #bus station and related facilities# includes pedestrian-oriented public spaces that, in their sizes and locations, reflect appropriate consideration of existing or planned at-grade pedestrian circulation networks;
- (iv) the design of the facility, including public entrances to the bus station, vehicular entrances and exits, bus ramps or overpasses, and accessory #uses# within the #bus station and related facilities# are sited and designed in a manner that reflects appropriate consideration of the civic importance of the site and of the experience of pedestrians within existing or planned #streets# or open areas;
- (v) the locations of at-grade entrances to such #bus station and related facilities# are designed to encourage pedestrian circulation into and on the #zoning lot# and are well-situated in relation to existing and proposed at-grade pedestrian and bicycle circulation networks;
- (vi) the bus station provides adequate connections to and from existing transportation facilities;
- (vii) the bus station and surrounding transportation network accommodate projected bus volumes and reduces potential conflicts between buses and other

modes of transportation in the surrounding area; and

(viii) the #use# and #development# of the bus station will not have undue adverse impacts on the character of or land uses in the surrounding area.

(3) Findings applicable to modifications other than those allowing the #bus station and related facilities#

In order to modify any other applicable regulations of this Resolution, the Commission shall find that:

- (i) such modifications will facilitate an improved site plan for the #bus station and related facilities# or are otherwise in furtherance of the bus station project;
- (ii) such modifications will not unduly obstruct access to light and air from surrounding #streets#, open areas and properties; and
- (iii) any proposed modification of regulations governing #zoning lots# divided by district boundaries or the permitted transfer of #floor area# will not unduly increase the #bulk# of any #development# or #enlargement# on the #zoning lot# or the intensity of #use# on any #block# to the detriment of occupants of #buildings# on the #block# or the surrounding area.

The Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area.

LAST AMENDED

6/6/2024

In C3, C4, C5, C6, C7 or C8 Districts or in any #Manufacturing District#, the City Planning Commission may permit the construction, reconstruction, or #enlargement# of heliports and their facilities listed under Use Group IV(B) where the applicant has submitted a site plan showing the location of landing areas, provided that the following findings are made:

- (a) that the heliport is an appropriate #use# of the land and will not unduly interfere with surrounding land #uses#; and
- (b) that due consideration has been given to the selection of a site situated near or adjacent to large parks or other open areas, or bodies of water.

The Commission shall refer the application to the Federal Aviation Administration for the report of such agency as to whether the heliport is either an integral part of, or will not interfere with, the general plan of airports for New York City and the surrounding metropolitan region.

The Commission may prescribe appropriate additional conditions and safeguards to minimize adverse effects on the character of the surrounding area.

The Commission shall require the provision of adequate #accessory# off-street parking spaces necessary to prevent the creation of traffic congestion caused by the curb parking of vehicles generated by such #use# and shall determine the required spaces in accordance with the purposes established in the Resolution with respect to other major traffic-generating facilities.

---

## **74-147 - Public transit or railroad electric substations**

---

LAST AMENDED

6/6/2024

In all #Residence# and #Commercial Districts#, and in M1 Districts in the #Special Downtown Jamaica District#, the City Planning Commission may permit public transit or railroad electric substations, listed under Use Group IV(B), limited in each case to a site of not less than 40,000 square feet nor more than 10 acres, provided that the following findings are made:

- (a) that there are serious difficulties in locating such #use# in a nearby district where it is permitted as-of-right;
- (b) that the site for such #use# is so located as to minimize the adverse effects on the integrity of existing and future development;
- (c) that the architectural and landscaping treatment of such #use# will blend harmoniously with the rest of the area; and
- (d) that such #use# will conform to the performance standards applicable to M1 Districts.

The Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area, including requirements for soundproofing of electric substations, for the construction of fences, barriers, or other safety devices, for surfacing of all access roads and driveways, for shielding of floodlights or other artificial illumination, or for landscaping or screening.

---

## **74-148 - Railroad passenger stations**

---

LAST AMENDED

6/6/2024

- (a) Except as provided in paragraph (b) of this Section, the City Planning Commission may permit the construction of railroad passenger stations listed under Use Group IV(B) in all districts,

provided that the following findings are made:

- (1) that the principal access for such #use# is not located on a local #street#;
- (2) that such #use# is so located as to draw a minimum of vehicular traffic to and through local #streets# in residential areas; and
- (3) that vehicular entrances and exits for such #use# are provided separately and are located not less than 50 feet apart.

The Commission may prescribe appropriate conditions and safeguards to minimize adverse effects on the character of the surrounding area, including requirements for shielding of floodlights or surfacing of access roads or driveways. In addition, the Commission shall require the provision of adequate #accessory# off-street parking spaces necessary to prevent the creation of traffic congestion caused by the curb parking of vehicles generated by such #use#, and shall determine the required spaces in accordance with the purposes established in this Resolution with respect to other major traffic-generating facilities. The Commission shall require, in any event, not less than 20 spaces for the temporary parking of automobiles, and three spaces for buses.

- (b) In Community Districts 4 and 5 in the Borough of Manhattan, the Commission may permit the construction of railroad passenger stations and ventilation facilities or other facilities or services used or required in connection with such railroad passenger station or in connection with an underground railroad right-of-way that provides access to such railroad passenger station, and may permit waivers of applicable #bulk# regulations, other than #floor area ratio#, in connection with such ventilation facilities, or other facilities or services, provided that the following findings are made:

- (1) that the principal access for such railroad passenger station is not located on a local #street#;
- (2) that such railroad passenger station is so located as to draw a minimum of vehicular traffic to and through local #streets# in residential areas;
- (3) that any vehicular entrances and exits for such railroad passenger station are provided separately and are located not less than 50 feet apart;
- (4) that the locations of at-grade entrances to such railroad passenger station are well situated in relation to existing at-grade pedestrian circulation patterns;
- (5) that any below-grade pedestrian circulation elements provided in connection with the railroad passenger station are well integrated with any existing or planned below-grade pedestrian circulation networks providing connections to and from other transportation facilities; and
- (6) for ventilation facilities or other facilities or services used or required in connection with a railroad passenger station or in connection with an underground railroad right-of-way that provides access to a railroad passenger station, that:
  - (i) any #bulk# modifications are the minimum necessary for the proper operation of the facility; and
  - (ii) the design of the facility will blend harmoniously with the surrounding area or that a process has been created with the purpose of ensuring that the future design of the facility takes into account existing conditions and anticipated development in the surrounding area.

Railroad passenger station entrances provided pursuant to paragraph (b)(4) of this Section and railroad passenger station emergency access stairs, located within #publicly accessible open

areas# of #zoning lots# subject to the provisions of Section [81-542](#) (Retention of floor area bonus for plazas or other public spaces), shall be permitted obstructions within such #publicly accessible open areas#, provided that the Commission finds that any encroachment within such #publicly accessible open areas# by such entrances or emergency access stairs will facilitate improved pedestrian circulation to, from and within the proposed railroad passenger station.

The special permit shall provide that such #publicly accessible open area# shall be designed and improved in connection with the installation of entrances or railroad passenger station emergency access stairs pursuant to a site plan accepted by the Chairperson of the Commission. The proposed site plan shall be referred to the affected Community Board, City Council Member and Borough President. Included with the site plan shall be a report to the Chairperson demonstrating that any comments and recommendations of the affected Community Board, City Council Member and Borough President have been considered, as set forth in a written response to such comments or recommendations. Where design modifications have been made in response to such comments and recommendations, the report shall identify how the design has been modified. The Chairperson shall not accept such site plan prior to 60 days after such referral. A #publicly accessible open area# improved pursuant to an accepted site plan shall be deemed to be certified pursuant to Section [37-625](#) (Design changes) and the standards set forth therein. Subsequent modifications of the site plan for such #publicly accessible open area#, including modifications involving the co-location of transportation facility entrances, shall be subject to this paragraph. An application to modify the site plan to facilitate the co-location of railroad passenger station entrances may be filed by the transportation agency seeking to co-locate a transportation facility entrance in the #publicly accessible open area# or by the property owner. Such application shall include evidence of consultation with any transportation agency with existing or planned facilities located in the #publicly accessible open area#. The modified site plan shall also be referred to such transportation agency by the Chairperson for comment.

The Commission may prescribe appropriate conditions and safeguards to minimize pedestrian

and vehicular congestion and to minimize adverse effects on the character of the surrounding area, including requirements for shielding of floodlights, surfacing of access roads or driveways, mitigation of pedestrian impacts, signage requirements, or screening or placement of the facilities or services permitted pursuant to paragraph (b) of this Section.

---

## 74-149 - Seaplane bases

---

LAST AMENDED

6/6/2024

In all districts, the City Planning Commission may permit seaplane bases listed under Use Group IV(B) provided that the following findings are made:

- (a) that such #use# and the take-off and landing operations it serves are so located as not to impair the essential character or future #use# or #development# of the surrounding area; and
- (b) that such #use# is so located as to draw a minimum of vehicular traffic to and through local #streets# in residential areas.

The Commission shall refer the application to the Federal Aviation Administration for the report of such agency as to whether the seaplane base is either an integral part of, or will not interfere with, the general plan of airports for New York City and the surrounding metropolitan region.

The Commission may prescribe appropriate additional conditions and safeguards to minimize adverse effects on the character of the surrounding area.

The Commission shall require the provision of adequate #accessory# off-street parking spaces necessary to prevent the creation of traffic congestion caused by the curb parking of vehicles generated by such #use# and shall determine the required spaces in accordance with the purposes established in this Resolution.
