37-94 - Refuse Storage

LAST AMENDED
11/28/2007

All site plans must show an area designated for refuse storage. Any container used for refuse storage must be enclosed and screened either within a #building# or an #accessory# #structure#. If refuse storage is located in a container or #accessory# #structure#, it must be located at least 50 feet from any #street line# and screened on all sides by a six foot high masonry wall, with one side consisting of an opaque, lockable gate.
